AGRICULTURAL STATISTICS, IRELAND.

THE ESTIMATED AVERAGE PRODUCE OF THE CROPS

AND

EMIGRATION FROM IRELAND

IN THE YEAR 1863.

TO HIS

EXCELLENCY GEORGE WILLIAM FREDERICK, EARL OF CARLISLE, K.G.,

&c., &c., &c.,

LODGE DESPATCHES—GENERAL AND CHIEF CLERK OF THE OFFICE.

MAY IT PLEASE YOUR EXCELLENCY,

On the 14th of August, 1863, I had the honour to submit a return of the extent of flax in each county and province in 1862 and 1863, and on the 25th of September following General Abstracts of the acreage under the various crops, and the number and description of live stock in the different counties and provinces,—also the number of persons who emigrated from Ireland during the first seven months of the same years.

I now beg to submit Tables showing the *estimated produce* of the crops in each county and province in 1862 and 1863; also the number of emigrants from Ireland in the same years,—the counties whence they came,—the ports at which they embarked, and their sexes and ages.

The mode adopted in obtaining the information as to the *average produce* of the crops was the same as in former years. The Enumerators filled up returns for every Electoral Division throughout the country of the *acreable yield* of each of the crops; the information being procured from intelligent landholders, or other persons acquainted with the subject, all of whose names have been furnished to me. On the receipt of these returns they were copied in this Office and forwarded to the Board of Guardians of each Union for their approval or revision; and it is gratifying to state, that out of the entire 3,438 Electoral Divisions—the yield for 2,269 has been revised by the Guardians, to whose invariable courtesy I am much indebted.

The Tables give the *estimated total produce* of cereals in quarters, and the estimated produce per statute acre, also the total produce in cwts. for each county and province, and for all Ireland, in 1862 and 1863. The yield of potatoes, green crops, and hay is given in tons, and of flax in stones. The extent under each crop is given in statute acres. A Table (page 12) shows *comparatively* the produce of the various crops in 1847, and from 1849 to 1863, and the acreage under each crop.

The only alteration in the construction of these Tables from that of former years is in the weights describing the *acreable yield* and the *total produce* of cereals and potatoes, which were given heretofore in "barrels" and "bushels." The "hundred weight" of 112lbs. has now been substituted, in conformity with the provisions of the Act 25 & 26 Victoria, cap. 76, being "An Act to amend the Weights and Measures (Ireland) Act, to abolish Local and Customary Denominations of Weights, and to regulate the mode of weighing articles sold in Ireland." The produce of cereals is still given in *quarters*, as well as *cwts.*

By the returns, there appears to have been a total decrease of 94,980 acres in the extent of land under tillage in 1863 compared with 1862. Cereals decreased by 143,534 acres. Potatoes increased by 5,302, and turnips and mangel wurzel diminished by 32,073 acres. There was an increase in flax to the large extent of 64,029 acres, and in cabbage of 3,582 acres. Meadow also increased, there being 7,714 acres more in 1863 than in 1862.

In the *acreable yield* there has been an increase in all the crops in 1863 compared with 1862, with the exception of hay, in which there was a slight decrease.

Notwithstanding the decrease in the acreage under cereals in 1863 compared with

1862, there has been, owing to the greater yield, an increase of 1,893,541 quarters in the total produce of these crops. Potatoes produced 1,297,547 tons more in 1863 than 1862. In turnips the increase was 390,990 tons. Mangel wurzel diminished by 36,456 tons. Cabbage increased by 85,987 tons. In the yield of flax there was a considerable increase—18,388 tons—not only in consequence of a much larger extent having been sown in 1863, but also of a greater produce per acre than in 1862. Hay produced 19,496 tons less in 1863 than in 1862, caused by a slight decrease in the average yield. These results are given in detail in the following Tables.

TABLE I.—The extent under each of the principal Crops in 1862 and 1863, and the increase or decrease in the latter year.

In submitting the General Abstracts in September last, which gave the average under the different crops, I ventured to make the following remarks:—

"The average produce of the crops cannot be so satisfactorily ascertained until after the general harvest has been gathered in; but from inquiries which I have made in many well-informed quarters, as well as from the very favourable accounts given by the provincial press in all parts of the country, it may be fairly estimated that the yield of the cereal crops in particular this year (1863) will prove above the average which has been known for many seasons in Ireland; and although there is a falling off in the total average, yet it is confidently expected that it will be compensated by the abundant produce of almost all crops—the total value of which, it has been computed, will in 1863 exceed that of the crops of last year by several millions sterling, and approximately to that of some of our best years. In flax alone the increase in value over 1862, caused by the larger average of 64,088 acres, combined with the abundant yield and superior quality, will, it is estimated, amount to £1,600,000."

These observations, it is very satisfactory to state, have been fully realized by the actual increase in the yield of nearly all the crops, especially in that of flax, as exhibited in the foregoing Tables.

As the subject of the growth of flax in Ireland now occupies so much public attention, I have given at page 10 a Table showing the number of scutching mills in each County, by Baronies, which I trust will prove useful to those interested in the subject.

METEOROLOGICAL OBSERVATIONS.

I beg to subjoin an abstract of the Meteorological Observations for the year 1863, taken at the Ordnance Survey Office, Phoenix Park, Dublin, for which I am indebted to Captain Wilkinson, R.E. The mean temperature of the thermometer, according to this abstract, was 49°·8 being 1°·3 higher than in 1862. The highest reading of the barometer, corrected and reduced to 32° Fahrenheit, was 30·443 on February 13th, at 9 30, A.M.; the lowest reading was 28·638 on October 29th, at 9 30 A.M., wind S.W. The highest temperature in the air during the year was 80°·4 on July 11th, and the lowest

26° 0 on the 12th of February; the highest in 1862 was 73° 9 on the 27th of August, and the lowest 19° 9 on the 3rd of March. Rain fell on 212 days, being nearly 7 months of rainy days; the greatest rain-fall in 24 hours was 1·805 inches on the 26th of August, with the wind from the S.W. The prevailing wind was from the S.W., from which quarter it blew on 117 days. The strongest winds were on the 29th and 31st of October, the pressure being 25 lbs. to the square foot. The mean number of days in each month the sky was overcast with cloud was 14.

EMIGRATION FROM IRISH PORTS IN 1863.

The total number of persons who emigrated from Ireland during the year, who stated it was not their intention to return, amounted to 117,830—61,690 males and 56,130 females, —being an increase of 45,090 persons compared with 1862.

The following Table shows the emigration from each Province during 1862 and 1863:—

From the foregoing Table it will be seen that of the total number who left the country, in 1863, stating it was not their intention to return, 15,020 were from Leinster,—54,870 from Munster,—22,497 from Ulster, and 17,815 from Connaught. The provinces from which 7,027 emigrants came were not ascertained, and 591 persons were residents of other countries.

As to the ages of the emigrants, including both sexes, 19,966—or 16.9 per cent., were under 15 years of age; 76,523—or 65 per cent., were from 15 to 35; 13,785—or 11.7 per cent., were 35 years old and upwards; and the ages of the remaining 7,536—or 6.4 per cent., were not ascertained.

In conclusion, I beg to express my respectful acknowledgments to the Landed Proprietors and Tenant-farmers, who so readily afforded the Enumerators the required information respecting the agricultural produce of their several districts; to the Poor Law Guardians, who revised the Returns; and also to the Clergy of all denominations and to the Public Press, for their continued valuable assistance in reference to these statistics. I beg to add, that those members of the Constabulary and Metropolitan Police who were selected to act as Enumerators discharged the duties allotted to them in their usual efficient manner.

I have the honour to be

Your Excellency's

Very faithful servant,

WILLIAM DONNELLY,

Registrar-General.

CIRCULARS

AND

COPIES OF THE FORMS USED IN OBTAINING THE AVERAGE YIELD
OF THE CROPS PER ACRE, FOR 1863.

Agricultural Statistics' Office.

5, Henrietta-street, Dublin.

10th November, 1863.

Sir,

You will receive herewith blank copies of "Form C," referred to in the "General Instructions" addressed to the Enumerators the 18th of last May, in order to enable you to procure Returns of the *Rates of Produce* of the various Crops grown in each of the *Electoral Divisions* mentioned in the enclosed List, which should be sent back to this Office with these Returns—*as early as possible*—when completed.

I beg you will be so good as to select for this service Enumerators known to you for their intelligence and acquaintance with the parties resident in the *Electoral Divisions* for which the Returns are required. Instructions as to the method of filling the Forms are printed on them. *Pray direct the Enumerators to pay particular attention to these instructions.*

From the friendly co-operation and assistance afforded to the Enumerators by all ranks and classes when collecting the Agricultural Returns for this year, I confidently trust that by making inquiries from the resident Gentry, Clergy, and Intelligent Farmers in the Districts, a valuable approximation will be arrived at the average Rates of Produce per Acre of the various kinds of Grain, Potatoes, and other Crops grown in the several *Electoral Divisions*;—that being the object of this Return,—to which accuracy, as far as possible, can alone give any real value.

Your attention is particularly requested to this subject, in consequence of the increasing importance of Agricultural Statistics, and I trust you will be enabled to forward the Returns for your District to this Office before the 1st of December, in order that a General Abstract of the results may be compiled and submitted for the consideration of His Excellency the Lord Lieutenant.

It is my intention, as in former years, to solicit the assistance of the Boards of Guardians on this difficult question, in order to procure their opinions as to the Rates of Produce in the several *Electoral Divisions*. This information will form a valuable auxiliary to that obtained through the Constabulary.

I am, Sir,

Your obedient servant,

WILLIAM DONNELLY, Registrar-General.

Fish, in barrels, in quarters of 4 lbs.			
Rape Seed, in bushels of 14 stones,			
Rape (for feeding purposes), in tons, . . .			
Straw, in tons, . . .			

*Note.—The Irish Acre is equal to 16. 2 1/2 English or Statute Measures.

I certify that I have procured the information contained in the foregoing Returns from the Persons there named, who in my opinion were well qualified to give it, and I believe the Estimated Average Rates of Produce to be correct. Dated at _____ this _____ day of _____, 1863.

(Signature of the person by whom the information was obtained)

I believe the foregoing Return to be correct.

— Sub-Inspector.

INSTRUCTIONS.

1. In filling in the Rate of Produce, the yield will be stated per Irish and also per English or Statute Acre, for each Crop, and the Enumerator will be careful to enter the Rate in the Weight or Measure used in the Locality, as directed by the note at the head of the Form. It is particularly to be borne in mind that the average yield per Acre is for the entire Electoral Division—not for any individual Farm or portion of the Electoral Division.

2. One Form will be filled by the Enumerator for each Electoral Division, as per List furnished to the Sub-Inspector.

3. The information as to the probable yield of the Electoral Division for which the Return is made, should be procured from intelligent Landholders of the District, whose Names and Addresses will be stated in the column left for that purpose.

4. The greatest care should be taken in filling these Forms, and the information should be procured and the Return sent to the Sub-Inspector of the District, on the 10th of November—sooner if practicable.

5. In those parts of the country in which the Cus-

singhams Measure is used, the word "Irish" may be erased with the pen, and the word "Cunningham" substituted at the head of the column. A Cunningham Acre is equal to 1A. 1R. 6C. English or Statute Measure.

Agricultural Statistics Office,
5, Henrietta-street, Dublin,
3rd December, 1863.

GENTLEMEN,

I take the liberty of enclosing copies of Returns showing the estimated average produce by the English, and also by the Irish Acre, of the various crops grown in 1863, within each Electoral Division of the Union. In order to procure from the Guardians their opinion as to whether the AVERAGE PRODUCE per Acre,—obtained by the Enumerators from resident Landholders,—fairly represents the yield of the respective crops.

In case the Guardian signing the Return considers any rate of Produce entered upon it to be above or below what it should be, columns are provided in which to insert the corrected rate.

As these Forms may be filled without much trouble, I shall feel much obliged if the Guardians will be so good as to favour me with their opinion respecting the yield of the various crops in their Union, and these will be interesting the value of these Returns, which are of so much general importance to the community.

May I request you will be so good as to give directions to the Clerk of your Board to return these Forms to me as soon as possible, as they are required to assist in compiling for publication the Table of estimated average produce of the Crops in 1863.

In case it is inconvenient to obtain the signature of an Ex-Officio or Elected Guardian, particularly connected with an Electoral Division, the signature of any other Guardian acquainted with the District will be sufficient;—or, if these rates of produce are discussed and decided upon at a Meeting of the Board, the signature of the Chairman, or of the Clerk, with his approbation, will answer the purpose.

I beg to take this opportunity of expressing my obligations to the many Guardians who were so kind as to

assist me in the revision of the Returns of Produce in 1862, and I trust that, on public grounds, I may be excused for soliciting the opinion of your Board on this subject.

Communications to this Office NEED NOT be prepaid.

I am, Gentlemen, your faithful servant,

WILLIAM DONNELLY, Registrar-General.

To the Chairman and Board of Guardians
of the Union of ————

AGRICULTURAL STATISTICS—IRELAND, 1863.

RATES OF PRODUCE.

Table of ———— Electoral Division of ————

RETURN of the AVERAGE RATES of PRODUCE of the undermentioned Crops, as made by the Constitutory Enumerators, submitted for the opinion of the Guardians of the Union of ————

CROPS.	Average Produce as returned by the Constitutory Enumerators.		Corrected Average Produce according to the opinion of the Guardians.	
	Per English or Statute Acre.	Per Irish Acre.	Per Irish Acre.	Per English or Statute Acre.
Wheat, in barrels of 20 cwt.,				
Oats, do., 14 do.				
Barley, do., 16 do.				
Barn, do., 16 do.				
Rye, do., 20 do.				
Beans, in bushels of 5 gallons,				
Peas, do., do.,				
Peas, in barrels of 20 cwt.,				
Turnips, in tons, . . .				
Manure, do., . . .				
Carrots, do., . . .				
Cabbages, do., . . .				
Green Potatoes (for feeding purposes), in tons, . . .				
Flax, in staves of 34 lbs., . . .				
Hay, in tons, . . .				
Do., in tons, . . .				

In my opinion, the Average Rates of Produce returned by the Constitutory Enumerators for the Electoral Division of ———— are fairly stated, except for those Crops opposite to which an amended Rate is given.
